

## **Director, Maternal Child Services Sellersville, PA**

In an environment where obstetrical units throughout Pennsylvania are closing, Grand View Hospital's commitment to providing quality OB services remains rock-solid.

Grand View Hospital is a 225-bed community hospital centrally located between Philadelphia and the Allentown/Bethlehem area in beautiful Upper Bucks County. We are currently undergoing a \$7 million renovation project that will result in expanded maternity postpartum and labor/delivery units. We are the area's only inpatient pediatric unit with pediatricians from the Children's Hospital of Philadelphia (CHOP).

Our growing Maternal Child Services Division seeks a dynamic leader to oversee the effective delivery of competent, compassionate and efficient patient care in Labor and Delivery, Postpartum, Nursery, Healthy Beginnings Clinic and Pediatrics. This includes overall direction of clinical, human resources, financial management and strategic planning.

Qualified candidates will possess an MSN plus a minimum of 3 years acute maternal/child experience and proven background in a managerial role. Specialty certification in obstetrics is strongly desired.

At Grand View Hospital, you'll enjoy on-site childcare, free fitness membership and a convenient Upper Bucks County location.

If you're looking to put your leadership skills to work in a modern, technologically advanced environment, join us. Apply online at [www.gvh.org](http://www.gvh.org). EOE
